COURSEWORK

Module	Programming Fundamentals
Coursework Title	Bill Printing System II
Coursework Type	Practical Exercise

Bill Printing System Part II

**After bill Print according to last assignment(Figure 1) ,Implement it as given below.

The customer-given amount get as user input at the end of the bill print. After user input, the system should calculate the Change. The change means the amount to be paid as a balance to the customer. After calculation, System should print Net Amount(bill value), Cash(customer-given amount) and Change as given below(Figure 2).

The remaining money in this shop should be given by spending the least number of currency notes and least number of coins. Therefor system should calculate that and print given currency notes and coins as Figure 3.

225,Galle Road,Panadura.			
# Tel : 0703859855 # Name : Kasun

Guidelines

1. Demo Video Reference

- Click this link to refer demo video - [DemoVideo](#)
- The demo is provided to help you better understand the task requirements and clarify any doubts you may have.

2. Programming Requirements

- Use the Scanner class to obtain input from the command-line interface.
- Ensure your program runs correctly and reflects your individual understanding.

3. Submission Instructions

- Follow the instructions provided in the LMS.
- Submit your Java code without changing the file name on or before the coursework deadline.

4. Academic Integrity Policy

- This task must be completed individually.
- Do not use AI tools, code generators, or copy answers from any external sources or other students.
- Submissions must represent your original work and effort.

5. Support

- If you require any clarification, please feel free to contact your instructor before the deadline.
